Date: Wednesday, September 23, 2015 3:04:59 PM

Katrina,

START can work on getting you the final figures and tables by the end of next week. As we discussed, the final report won't be completed due the potential for additional assessment work.

Subject: RE: Wilcox Residential Data Submittal Status

Mark, we will be out at the site on October 21 for an open house. We would like to talk with the residents prior to the meeting, October 18, 19, and 20. In order to do that we are going to need the data, figures, and final report.

What is the status of the remaining work that needs to be completed before we get a copy? In addition, is there a review/comment time for us to prepare for?

thanks

Patrick/Derrick,

Please address Katrina's questions below.

Thanks

Subject: RE: Wilcox Residential Data Submittal Status

Mark/Patrick, I have a few questions on the data table. Thanks

1. Please provide the figures that show the grid numbers for each resident.
2. Please provide figures that show where oil was found (grid and possible point location) and at what depth.
3. I assume that the sample notation is as follows—WO-002-001-00-51 (WO-wilcox oil 002=resident number 001=grid location 00=0-6in depth [06=6-12 in depth and 12=12-24indepth] and 51 is the sample where 52 would be the duplicate. Is this correct?
4. The soil tab is a summary of all data. Each tab represents one resident. On the resident tab, if an analyte was not detected in any sample then it appears to not be listed. For example, under the resident 2 tab, silver and thallium are not listed and presumed to be not listed because there were no detects. Is this correct?
5. The note states that the yellow highlight indicates an exceedance of the RSL and RML where the green is an indication of RML exceedance. I believe the yellow is only the RSL. Please refer to the soil tab.
6. If the detection limit exceeded the RSL/RML, was it highlighted?
7. If a sample depth is missing, I assume that there was no recovery. Is this correct?

Hi Katrina,

Glad that you asked. We just finished review on the Draft tables. We will be doing a final QA on it

this week just to ensure that everything is accurate, but we aren't expecting any changes.

Please see the attached and let us know if you have any questions or concerns.

Thanks,
Patrick

Patrick, will you please provide us with an update on the status of the residential data. Please respond to all. I will be out of the office beginning Friday, 4th through Friday, 11th and will not be able to forward to those that need to review.

thanks

Hi Katrina,

Sorry for the delay in getting back to you on the data progress. I just spoke with Mark and explained to him that the Gold King Mine ER has pulled several of our resources who were currently working on the data evaluation.

Our goal is to get back to work on reviewing and loading the data and ensure that we have received everything from the labs as the first priority, which we will attempt to have completed by the end of this week. Once we are certain that we have received all of the data, we will then be able to begin to generate tables for your review along with the figures showing where any exceedances might have been.

We will get these tables for you as soon as we can, our goal is by the end of next week to have the

first round of draft tables completed for review.

Thanks,
Patrick

Mark,

We are currently working on loading the data and confirming that we have all of the data. It should be mid-week when we will have data tables ready.

Derrick,

All sample results should've been submitted from the lab. How soon can you guys have a preliminary report/data tables completed?
